A DISSERTATION SUBMITTED TO THE GRADUATE SCHOOL  
IN PARTIAL FULFILLMENT OF THE REQUIREMENTS  
FOR THE DEGREE  
MASTERS IN MECHANICAL ENGINEERING

DEPARTMENT OF MECHANICAL ENGINEERING

Dissertation Director:  
Professor Dr. Eric Monsu Lee

## TABLE OF CONTENTS

Chapter	Page
1 INTRODUCTION . . . . .	1
1.1 Air Pollution . . . . .	2
1.1.1 Chemical Pollution . . . . .	2
1.1.2 PM Pollution . . . . .	2
1.2 Particulate Matter (PM) . . . . .	2
1.2.1 Definition. . . . .	2
1.2.2 Sizes . . . . .	2
1.2.3 Comparision with Human Hair . . . . .	2
1.3 Health Impacts of PM2.5 . . . . .	2
1.4 Regulation of PM2.5 . . . . .	2
1.4.1 For Outdoor Spaces . . . . .	2
1.4.2 For Indoor Spaces . . . . .	2
1.5 Sources of PM2.5 . . . . .	2
1.5.1 Outdoor. . . . .	2
1.5.2 Indoor . . . . .	2
1.5.3 Recently Identified Sources . . . . .	2
1.6 The Scenarion of Indoor PM2.5 . . . . .	2
1.7 PM control technology. . . . .	2
1.7.1 Centrifugal Seperation: Pros and Cons . . . . .	2
1.7.2 Dry and Wet Scrubber: Pros and Cons . . . . .	2

Chapter	Page
1.7.3 Baghouses: Pros and Cons . . . . .	2
1.7.4 Electrostatic Precipitation (ESP) . . . . .	2
1.7.4.1 Mechanism of Particle Charging and Collection . . . . .	2
1.7.4.2 Field Charging and Diffusion Charging . . . . .	2
1.7.4.3 ESP: Pros and Cons . . . . .	2
1.8 Control Technology for Indoor . . . . .	2
1.8.0.1 HEPA: Pros and Cons . . . . .	2
1.8.0.2 Ionizer: Pros and Cons . . . . .	2
1.9 ESP for PM2.5 in Indoor Space . . . . .	2
1.9.0.1 Compact size . . . . .	2
1.9.0.2 Enhance Efficiency for Submicron PM. . . . .	2
2 LITERATURE REVIEW . . . . .	3
2.1 Agglomeration . . . . .	4
2.1.1 Chemical Agglomeration: Pros and Cons for Indoor Use . . . . .	4
2.1.2 Acoustic Agglomeration: Pros and Cons for Indoor Use . . . . .	4
2.1.3 Turbulent Agglomeration: Pros and Cons for Indoor Use . . . . .	4
2.1.4 Electrostatic Agglomeration. . . . .	4
2.1.4.1 Two Stage Electrostatic Agglomeration: Pros and Cons for Indoor Use . . . . .	4
2.1.4.2 Single Stage: Requires Turbulence for Agglomeration . . . . .	4
2.2 Turbulent Agglomeration by Vortexes Interaction for Indoor Use. . . . .	4
2.3 EHD flow in ESP . . . . .	4
2.3.1 Parameters to Manipulate EHD flow in Single Stage ESP. . . . .	4
2.4 Large-Scale EHD Vortex Flow . . . . .	4

Chapter	Page
2.5 Characterization of EHD Vortex Flow . . . . .	4
2.6 Obtaining Large-Scale EHD vortex FLOW for submicron Particle Agglomeration 4	
REFERENCES . . . . .	5

# CHAPTER 1

## INTRODUCTION

### 1.1 Air Pollution

#### 1.1.1 Chemical Pollution

#### 1.1.2 PM Pollution

### 1.2 Particulate Matter (PM)

#### 1.2.1 Definition

#### 1.2.2 Sizes

#### 1.2.3 Comparison with Human Hair

### 1.3 Health Impacts of PM<sub>2.5</sub>

### 1.4 Regulation of PM<sub>2.5</sub>

#### 1.4.1 For Outdoor Spaces

#### 1.4.2 For Indoor Spaces

## CHAPTER 2

### LITERATURE REVIEW

#### 2.1 Agglomeration

2.1.1 Chemical Agglomeration: Pros and Cons for Indoor Use

2.1.2 Acoustic Agglomeration: Pros and Cons for Indoor Use

2.1.3 Turbulent Agglomeration: Pros and Cons for Indoor Use

#### 2.1.4 Electrostatic Agglomeration

2.1.4.1 Two Stage Electrostatic Agglomeration: Pros and Cons for Indoor Use

2.1.4.2 Single Stage: Requires Turbulence for Agglomeration

2.2 Turbulent Agglomeration by Vortexes Interaction for Indoor  
Use

#### 2.3 EHD flow in ESP

2.3.1 Parameters to Manipulate EHD flow in Single Stage ESP

## REFERENCES
